

OOP - Lesson 4

Review and Practice

Review and Practice

- <https://app.dataquest.io/c/62/m/352/object-oriented-python/1/introduction>. Steps 1-9
- <https://realpython.com/python3-object-oriented-programming/>
- Complete class assignment from last lesson.

Enrichment Assignment

- Come up with the next assignment for the class.
 - It should include all the concepts that we've learned together so far.
 - Include concepts that you've learned in other classes/topics.
 - It should be very clear of what the requirements are and leave some room for creativity.
- Now, go ahead and start implementing the assignment.
- Incentive: if your assignment is chosen, you *might* get a free night of homework since you will have already completed it. ;)
